

Job Title: Senior Linguist/Open Source Analyst - Arabic

Clearance: TS/SCI

Location: Tampa, FL

Apply for any at: <http://www.cspacesol.com/page/10369/Cyberspace-Solutions-LLC-Careers>

Job Description: The Senior Linguist/Open Source Analyst shall provide language and cultural expertise to open source intelligence analysts, explaining and reflecting subtle nuances in the language and culture. Analysts shall accurately translate documents and broadcast and print media for the purpose of preparing recurring and non-routine reports and supporting Command open source information and media exploitation. The Senior Linguist/Open Source Analyst shall conduct a full range of open source research, analysis, and production tasks relative to USSOCOM focus areas in consonance with Global War on Terrorism (GWOT) requirements. The analyst shall collect, analyze, and disseminate open source information extracted from Internet blogs, websites, homepages, discussion forums, to include video media to assess the tactics, techniques, and procedures (TTPs) being used by terrorist and insurgent groups and organizations. The senior linguist shall provide direction, guidance and administrative functions for all contractor personnel assigned.

Job Requirements: The Senior Linguist/Open Source Analyst shall possess the following qualifications:

- Native linguistic experience in Arabic. Equivalent of a DPLT 3/3.
- 5 years OSINT experience (tools, analysis, reporting) either military or civilian.
- 5 years Military or Government civilian intelligence experience with analysis, reporting and briefing.
- Work history shall include at least 3 years' experience with special operations, inter-agency, or non-governmental organizations.
- TS/SCI Clearance
